2021 A Map of Gyeongnam Education Ecosystem

2021, *Major Transitions* in Gyeongnam Education Begin

"Turning imagination into reality", Future Education Theme Park blueprint(completion in Dec., 2022)

Through Major Transitions in Gyeongnam Education, New Future and New Education Begin.

Through customized learning and evaluation, we will implement a major transition in Classes.

By carrying out customized learning and evaluation that are making use of AI and Big Data, we will change the paradigm of school education.

We will implement a major transition in School Administration to reinforce educational competency.

Through an innovative school administration focusing on educational activities, we will establish the curriculum-based future school system.

Beginning with childcare services. we will implement a major transition in Education Welfare.

We will strengthen customized education welfare. going beyond universal welfare, and overcoming the educational gap between individuals and regions.

For a sustainable future. we will implement a major transition in Eco- Environmental Education.

By reinforcing eco-environmental education, and by learning to coexist with nature, we will preserve the clean and healthy future for our children.

Philosophy

Education that promotes voluntary participation and empathy

Democracy in schools is not limited to the meaning of procedure or form, which is a cultural practice. It is a way of life and a life-style for community members to resolve mutual issues by sharing their lives, developing relationships, and cooperating one another.

Education that provides high-quality learning without discrimination for everyone

The provision of the Constitution, 31(1), describes that everyone is entitled to be educated fairly according to their abilities. It is an important responsibility and assignment for public education to support all students who can reveal their potential to develop learning abilities.

Creative education, innovating educational contents and methodologies

Competency-centered education has to be implemented to prepare for the drastic changes resulting from the fourth industrial revolution. This includes the process of educational completion for a self-directed learner, containing future-oriented education, schools with futurity and innovating educational contents and methodologies.

Education that uses local resources and is devoted to the local community

We will implement various education systems with the local community by going beyond the school grounds and expanding the education ecosystem.

Policy Directions

Enjoyable Learning in School, Nurturing Together with Gyeongnam Education A new paradigm of student-centered learning A communicative and empathetic education community **Nurturing** democratic citizens A safe and healthy who learn together educational environment and lead the future A happy education welfare system A fair and transparent administrative support system Village education Class innovations community that Democratic that develop promote Primary Tasks school culture participation and competency cooperation

Beyond Education Innovation Toward Future Education

2021, the Year of *Major Transitions*

Gyeongnam Education Leads in Korean Education

With big data and AI-based customized learning, we will change the paradigm of education.

With solid support inside and outside the school, Teachers will be able to get closer to their students.

With more focus on education welfare, we will enhance the universal value of education,

For future generations, we will gather wisdom for coexistence.

We Innovate Classes with Customized Learning

A Major Transition in Classes

■ Supporting Future Competency-based Class Innovations

▼ Ensuring Sustainable Blended Learning

■ Building Futuristic Education System

■ Implementing 'I-TokTok', a Future Education Support Platform of the GOE

Major Transition

We Provide Quality Support Inside and Outside the School

A Major Transition in School Administration

- Expanding Operations of Integrated School Support Centers in Every Local Office of Education
- Reinforcing Administrative Work Teams for Developing School **Environment Fully Devoted to Classes**
- ✓ Innovating Educational Administration by Providing Engaged **Institutional Meetings**

We Make Education Welfare Services to Enable Individuals to be Happy

A Major Transition in Education Welfare

■ Running 'Neul-Bom', the Childcare Support Center-Main Office

✓ Strengthening Education Accessibility for Fair and Equitable Start

✓ Activating Rural School Revival Movement by Fostering Their Original Growth

We Will Ensure Childcare Services!

For 1st-4th Year Students of Elementary School(K1-4), Close at 8 p.m. on Weekdays

We Go Green and Save Earth at School

A Major Transition in Eco-Environmental Education

■ Implementing Business for Green-Smart School of the Future

 ■ Expanding Operations of Environmental Education Special Zone with Featuring Regional Characteristics
